

A lush indoor garden scene. In the foreground, a wooden table holds a small copper teapot with a plant. Behind it, a wooden crate holds a galvanized bucket with a plant. To the right, a bamboo chair with a cushion is visible. The background is filled with various green plants, including a large Monstera and a hanging plant. The scene is brightly lit, suggesting a sunny window.

Guide

Plant Care Guide

Taking care of plants is an incredibly rewarding experience. Here's some additional information to accompany the video that might help you in better caring for your house plants!

The follow is some clarification on terminology you might find on your plant tag:

Light

Direct (bright): full sunlight for 6+ hours per day.

Indirect (partial): diffuse sunlight for 3-6 hours of the day. Avoid direct sunlight.

Low (shade): shady conditions, but some indirect light (less than 3 hours) is welcomed.

Tip: "full shade" does not mean a plant can survive in a windowless room. All plants require sunlight!

Watering

Low: once every 2 weeks, or when most of the soil is dry.

Moderate: once a week, or when first 1-2 inches of top soil has dried out.

High: 2-3 times a week, when top soil has dried out.

Misting: use to produce humidity and to help clean the leaves.

Water more often: in the summer

Water less often: in the winter

Maintenance

Humidity: some tropical plants do well when the leaves are misted.

Leaf care:

- Wipe both side of leaves with a soft damp cloth monthly.
- Prune away leaves that are yellowed, browned, or withering.

Fertilizer:

- Generally only needed every 1-2 weeks during the "growing months" = spring and summer.
- A liquid variety works well for most indoor plants.

Plants love CONSISTENCY!

Consistency in:

- Frequency of watering
- Temperature
- Feeding of fertilizer
- Amount of watering
- Light
- Humidity

Use the page below to create a little reference guide for your house plants, simply fill in the blanks:

Picture or Plant Tag Here

Plant name: _____

How often does it require watering (& fertilizer):

In the summer: _____

In the winter: _____

Requirements for:

Light: _____

Temperature: _____

Humidity: _____

Additional notes: _____
